

Three important insurance policies to have.

Choose ICA Försäkring for good, affordable insurance. This is why we're Sweden's fastest-growing insurance company for consumers.

Home insurance

If you take out only one insurance policy, it's probably for home insurance. It's a fundamental insurance policy for the family that covers several important areas. For example, it protects your home, your belongings and everyone who lives there when you're out and about. You could claim on home insurance in the event of burglary, litigation and illness/accident abroad or if your bicycle is stolen, for example. ICA's home insurance offers the best basic protection of all, according to Konsumenternas.se

Car insurance

If you own a car, by law you must take out car insurance. You can choose between three levels of cover: third-party, partial and full. With ICA, you can have peace of mind that the cost won't increase, as the price of our car insurance is fixed. This means that if you don't make a claim, we promise not to increase the price for up to five years. Sound good?

Accident insurance

To protect all your family members financially, it's a good idea to take out accident insurance for the whole family. This means that you can receive compensation for damaged clothes, dental injuries or physical impairment, for example, should you happen to have a sudden accident. Valid around the clock and worldwide. With us, you get an extra favourable price when you insure the whole family.
